

Social Activity at- Laddoo Foundation, Kalol, 2015-16

WE LEARN, WE TEACH.

SCHOOL MAKEOVER: Kids learn from what they see. That's why it made sense to make their surroundings, especially school campus, lively, interactive and colourful. We decided to make their school, visually appealing by painting the walls with motivational and fun artworks so that the kids enjoy the learning process. We started travelling to villages, small towns, nearby slums, and offered to paint their school walls. This way, the school and its ambiance was filled with colours, new hopes, inspiring images, teachings, and most of all, liveliness to encourage parents and teachers as well as have the kids learn better.

Students of architecture and interior designing of semester –I (total 40 students) have visited the school (Anaganwadi) at kalol town to understand Measure drawing of the small space and to study the relative proportions, anthropometrics, human activity and the use of space, Interrelationship of architectural space to form, structure, and materials to help students develop a visual and tacit structural understanding through models.

1ST Semester students from Ganpat University collaborating with Laddoo Foundation has taken initiative to paint the school at kalol town. This collaboration helps students to understand the condition of the children. This initiative gave platform to our students to put all their creativity on board. A real life exposure helps our student to build self-confidence for their selves and future initiative sand collaborations.
